

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Technical Committee No. 3 Documentation and graphical symbols

Liaison report to the Kyoto meeting from ISO TC10 Technical drawings, product definition and related documentation

1 Organization management

1.1 ISO/TC10 Strategic Advisory Group (STAG)

Since last IEC plenary meeting ISO/TC10 has established a Strategic Advisory Group. Among the tasks for ISO/TC10 STAG, the followings might be of interest for IEC/TC3:

- Support TC10 and TC/SCs within general TPD standardization, terminology, utilisation of IT within TPD, future TPD technologies, etc
- Closely follow the development tendencies within IT and TPD technologies and the implementation among different standard users. Analyse these topics and prepare reports for TC10 strategic actions.
- On a high international level follow the development within IT and current analysis where there will appear a need for new IT based TPD standards.

As a number of these tasks are of common interest, especially the tasks approaching the IT field, IEC/TC3 is encouraged to discuss a future co-operation on a strategic level in this field.

1.2 Electronic work management

ISO CS has introduced *Livelink* as an electronic work management tool for a selected field of TC's. ISO/TC10 has adopted *Livelink* and at present the distribution of documents within the committee is fully electronic.

JWG's are urged to make all documents available on both the ISO/TC10 server and the IEC/TC3 server.

2 ISO/TC10 Standardization

2.1 ISO14617 Graphical symbols for diagrams.

After the Charlottenlund meeting discussions - during spring 1999 - between ISO CS and IEC CA led to the conclusion, that there were no basis for a continued co-operation on publication of a common standard for graphical symbols for diagrams.

Consequently ISO/TC10/SC10 has revised and renumbered the ISO/DIS14617 series. In part 2-5 – the common ISO and IEC parts – all electrotechnical symbols have been deleted. Part 21 to 26 have been renumbered to part 7 to 12.

The ISO/TC10/SC10 has forwarded the 2.DIS of ISO 14617 part 1 - 12 to ISO CS for distribution within ISO for voting.

J. Aagaard, Liaison Officer
