INTERNATIONAL ELECTROTECHNICAL COMMISSION

Technical Committee No. 3 Documentation and graphical symbols

Report from IEC TC3 Task Force for the specification of the information requirements for a graphical symbol data base

1 Members

No changes since the last report.

2 Scope

- Specification of the information requirements for a data base for graphical symbols.
- An information model which covers the requirements of IEC/SC3A-, IEC/SC3C-, ISO/TC10 and ISO/TC 145- symbols.
- A prototype of a data base with access via the world wide web.

3 Meetings

The Task Force had no meetings since the last TC3 meeting in Charlottenlund:

4 Result

A workshop was held on 29th and 30th March 1999 in Geneva with a part of the nominated members of the loading team. After a presentation of the actual status and a report of the first experiences in loading symbols into the database, the participants decided on basic rules for the entry of IEC 60617 into the database; refer to 3(Madrid/Secretariat)10. Further a splitting of the work for the parts 2 and 7 (Germany) part 11 (Denmark) and part 6 (Sweden) was decided. Experiences with the transfer and application of the rules as well as necessary changes shall be discussed on the first meeting of the new established Validation Team in Kyoto.

5 Further actions

The tasks of the group are settled. No further action unless new decisions of TC3 in Kyoto.

Reinhard Scholz
Acting chairman of TC3/TF
